

Key Skills: Addition and Subtraction Practice

Meets the following National Standards:

NCTM National Council of Teachers of Mathematics Standards and Focal Points:

Principles and Standards for School Mathematics

GRADES PRE-K - 2

Number and Operations

- Understand numbers, ways of representing numbers, relationships among numbers, and number systems
 - count with understanding and recognize “how many” in sets of objects;
 - use multiple models to develop initial understandings of place value and the base-ten number system;
 - develop understanding of the relative position and magnitude of whole numbers and of ordinal and cardinal numbers and their connections;
 - develop a sense of whole numbers and represent and use them in flexible ways, including relating, composing, and decomposing numbers;
- Understand meanings of operations and how they relate to one another
 - understand various meanings of addition and subtraction of whole numbers and the relationship between the two operations;
 - understand the effects of adding and subtracting whole numbers;
- Compute fluently and make reasonable estimates
 - develop and use strategies for whole-number computations, with a focus on addition and subtraction;
 - develop fluency with basic number combinations for addition and subtraction;
 - use a variety of methods and tools to compute, including objects, mental computation, estimation, paper and pencil, and calculators;

GRADES 3 - 5

Number and Operations

- Understand numbers, ways of representing numbers, relationships among numbers, and number systems
 - understand the place-value structure of the base-ten number system and be able to represent and compare whole numbers and decimals;
- Understand meanings of operations and how they relate to one another
 - identify and use relationships between operations, such as division as the inverse of multiplication, to solve problems;
 - understand and use properties of operations, such as the distributivity of multiplication over addition;
- Compute fluently and make reasonable estimates
 - develop fluency in adding, subtracting, multiplying, and dividing whole numbers;
 - select appropriate methods and tools for computing with whole numbers from among mental computation, estimation, calculators, and paper and pencil according to the context and nature of the computation and use the selected method or tools;

GRADES PRE-K - 12

Problem Solving

- Instructional programs from pre-kindergarten through grade 12 should enable all students to—
 - build new mathematical knowledge through problem solving;
 - solve problems that arise in mathematics and in other contexts;
 - apply and adapt a variety of appropriate strategies to solve problems;
 - monitor and reflect on the process of mathematical problem solving;

Connections

- Instructional programs from pre-kindergarten through grade 12 should enable all students to—
 - recognize and use connections among mathematical ideas;
 - understand how mathematical ideas interconnect and build on one another to produce a coherent whole;
 - recognize and apply mathematics in contexts outside of mathematics;

Key Skills: Addition and Subtraction Meets the following National Standards:

NCTM National Council of Teachers of Mathematics Standards and Focal Points:

Curriculum Focal Points

GRADE 1

Number and Operations and Algebra: Developing understandings of addition and subtraction and strategies for basic addition facts and related subtraction facts.

Children develop strategies for adding and subtracting whole numbers on the basis of their earlier work with small numbers. They use a variety of models, including discrete objects, length-based models (e.g., lengths of connecting cubes), and number lines, to model “part-whole,” “adding to,” “taking away from,” and “comparing” situations to develop an understanding of the meanings of addition and subtraction and strategies to solve such arithmetic problems. Children understand the connections between counting and the operations of addition and subtraction (e.g., adding two is the same as “counting on” two). They use properties of addition (commutativity and associativity) to add whole numbers, and they create and use increasingly sophisticated strategies based on these properties (e.g., “making tens”) to solve addition and subtraction problems involving basic facts. By comparing a variety of solution strategies, children relate addition and subtraction as inverse operations.

GRADE 2

Number and Operations and Algebra: Developing quick recall of addition facts and related subtraction facts and fluency with multidigit addition and subtraction.

Children use their understanding of addition to develop quick recall of basic addition facts and related subtraction facts. They solve arithmetic problems by applying their understanding of models of addition and subtraction (such as combining or separating sets or using number lines), relationships and properties of number (such as place value), and properties of addition (commutativity and associativity). Children develop, discuss, and use efficient, accurate, and generalizable methods to add and subtract multidigit whole numbers. They select and apply appropriate methods to estimate sums and differences or calculate them mentally, depending on the context and numbers involved. They develop fluency with efficient procedures, including standard algorithms, for adding and subtracting whole numbers, understand why the procedures work (on the basis of place value and properties of operations), and use them to solve problems.

ISTE National Educational Technology Standards for Students (NETS)

TECHNOLOGY FOUNDATION STANDARDS FOR STUDENTS

1. Basic operations and concepts
 - Students demonstrate a sound understanding of the nature and operation of technology systems.
 - Students are proficient in the use of technology.
2. Social, ethical, and human issues
 - Students practice responsible use of technology systems, information, and software.
 - Students develop positive attitudes toward technology uses that support lifelong learning, collaboration, personal pursuits, and productivity.
3. Technology productivity tools
 - Students use technology tools to enhance learning, increase productivity, and promote creativity.

Key Skills: Addition and Subtraction Meets the following National Standards:

ISTE National Educational Technology Standards for Students (NETS)

PERFORMANCE INDICATORS FOR TECHNOLOGY—LITERATE STUDENTS

Prior to completion of Grade 2, students will:

1. Use input devices (e.g., mouse, keyboard, remote control) and output devices (e.g., monitor, printer) to successfully operate computers, VCRs, audiotapes, and other technologies. (1)
2. Use a variety of media and technology resources for directed and independent learning activities. (1, 3)
4. Use developmentally appropriate multimedia resources (e.g., interactive books, educational software, elementary multimedia encyclopedias) to support learning. (1)
5. Work cooperatively and collaboratively with peers, family members, and others when using technology in the classroom. (2)
7. Practice responsible use of technology systems and software. (2)
9. Use technology resources (e.g., puzzles, logical thinking programs, writing tools, digital cameras, drawing tools) for problem solving, communication, and illustration of thoughts, ideas, and stories. (3, 4, 5, 6)

Prior to completion of Grade 5, students will:

1. Use keyboards and other common input and output devices (including adaptive devices when necessary) efficiently and effectively. (1)
4. Use general purpose productivity tools and peripherals to support personal productivity, remediate skill deficits, and facilitate learning throughout the curriculum. (3)
8. Use technology resources (e.g., calculators, data collection probes, videos, educational software) for problem solving, self-directed learning, and extended learning activities. (5, 6)
